purasolve

PAINT EQUIPMENT CLEANER

PAINTING EQUIPMENT CLEAN-UP SOLVENT

Paint Operations Equipment Clean-up Solvent

Purasolve Paint Equipment Cleaner is a unique cleaning compound, developed to replace MEK, Toluene blends, Acetone, Xylene, and other dangerous solvents for resin and paint application equipment clean-up.

Benefits

- Eliminates the risk of handling and use of explosive and toxic chemicals
- Reduces hazardous waste disposal costs significantly through recycling and reusing product for up to 18 months
- Improves user safety and comfort with low odour and high flash point
- Reduce your environmental footprint through reduction of hazardous waste disposal and VOC emissions
- Extend equipment life by eliminating drying out caused by evaporation

Testimonials

"The elimination of MEK has demonstrated cost savings of nearly $15,000 annually. Hazardous waste generation has decreased by almost 60%."
Pump and Valve Manufacturer

"The volume of hazardous waste disposed is reduced by greater than 85%."
Panel Repair Shop

"Our painters discovered that the purasolve Paint Equipment Cleaner was even more effective in the cleaning of the orifices of the gun heads. The most radical change that the painters experienced was the ability to clean the guns and cups in an open tank, without breathing the unpleasant fumes of the MEK."
