ENVIROSCALE

SCALE AND CALCIUM REMOVAL

Triple 7 Enviroscale

Triple7 Enviroscale is a non-toxic, plant based scale remover designed for its effectiveness, safety to you, the cleaning surface and the environment. The product is a unique formulation of non-ionic surfactants, fruit based acids and botanical additives which create a powerful scale remover.

Triple7 Enviroscale will not harm compatible equipment and gives longer life cycle maintenance and consequent cost advantages. Not recommended for use on aluminium, zinc, copper, or other reactive metals — always verify material compatibility before use.

Triple7 Enviroscale is a completely new concept for scale removal. Its powerful botanical formulation removes encrustation from a wide range of compatible surfaces — including steel, iron, and most hard industrial surfaces — with significantly lower corrosion risk compared to standard alternatives.

What's more, **Triple7 Enviroscale** is the only worksafe/ environmental descaler on the Australian market comparable to traditional pipework cleaners that cleans effectively without using harsh chemicals.

KEY SAFETY & ENVIRONMENTAL BENEFITS

- **Highest rate of scale removal – Lowest corrosion rate**
- **Cleans Effectively without using harsh chemicals**
- **Maintains the integrity of compatible cleaning surfaces**
- **Protects your assets and the environment**

ENVIROSCALE

SCALE AND CALCIUM REMOVAL

Effective

Triple7 Enviroscale removes the toughest deposits, it is water rinsable and is not affected by water hardness.

Safe for Equipment

Triple7 Enviroscale has a low corrosion factor on compatible metals, and is free of salts, strong acids, caustics and harsh chemicals. **Triple7 Enviroscale** removes encrustation from a wide range of compatible surfaces without system or equipment damage. It is not recommended for use on aluminium, zinc, copper, or other reactive metals.

Safe for Your Staff

Triple7 Enviroscale is non-toxic, non-hazardous and can be used at room temperature, enabling safe handling practices and no heating costs. **Triple7 Enviroscale** has no offensive odours and it has no special storage or protective clothing requirements. The product is also suitable for use in closed environments.

No Need to Disassemble Equipment

Triple7 Enviroscale can clean compatible steel and iron equipment while in operation, saving shut-down time, loss of production and labour costs. Always confirm that all system components are made from compatible materials before in-situ application.

Save on Labour

You can use less personnel to complete the job in less time, giving you more time to generate income.

Save on Running and Maintenance Costs

Triple7 Enviroscale returns equipment to optimum performance with less maintenance and longer equipment life and continual use of **Triple7 Enviroscale** prevents future build-ups.

Save on Disposal and Trade Waste Costs

Triple7 Enviroscale can be flushed with water through sewage systems- reducing costly disposal and trade waste costs.

Environmentally-Responsible

Triple7 Enviroscale is readily bio-degradable without detrimental effect on our environment when used as directed.

Applications

- Wet Scrubbers
- Heat Exchangers
- Reverse Osmosis Filters
- Engine Cooling Systems
- Pipework
- Boilers
- Condensers
- Chillers
- Duct Cleaning

Directions for Use

For typical applications dilute 1:10. Allow to stand or circulate for 1 to 6 hours, depending on degree of scale removal required. These recommendations are guidelines only, so consult your distributor or contact E.F.S for further technical advice.

Part No #	Product	Size
